

# zolid lunaris

New 2026

“Reliable as the Moon –

Radiant as a Smile.”

AMANN GIRR BACH

DENTISTRY UNIFIED

# Light-Years Ahead.

**Zolid Lunaris** is the latest addition to the trusted Zolid zirconia family. Inspired by the moon, it symbolizes reliability in everyday use—enhanced by an evolved color concept that captures today's leading market trends.

## Intense, chromatic A-D Shades.

The chromatic coloration of Zolid Lunaris is significantly more vivid than that of other Zolid products, dramatically reducing the need for post-processing: mill, sinter, glaze — done. The restorations exhibit a naturally vibrant and lifelike appearance.

## High strength for all fixed restoration types.

With over 1.000 MPa\*, it allows everything from single crowns to 14-unit bridges — reliable, durable, and versatile.

## High-speed sintering for maximum efficiency.

Sintered restorations in just 15 minutes — with no compromise on quality. Enables same-day restoration production.

## Comprehensive portfolio.

A versatile all-round solution with heights ranging from 12–30 mm, 16 A-D shades, and 5 bleach shades for maximum flexibility.

## Quality and service that impress.

Developed according to the highest standards with a 10-year warranty — backed by comprehensive training and support for reliable and safe restorations.

“Customer demands are changing — and that's exactly what drives us to continuously improve our products. Zolid Lunaris sets a new benchmark: its intensified coloring minimizes time-consuming steps while achieving an even more accurate match to the Vita Shade Guide. The successor to Zolid Gen-X delivers Amann Girrbach's premium quality combined with outstanding value.”

B.Sc. Melanie Röschmann, Senior Product Manager Consumables

“Zolid Lunaris takes high-speed sintering to the next level: crowns and up to three-unit bridges can be sintered in just 15 minutes with the Therm DRS, without compromising outstanding material properties. It makes the workflow exceptionally easy and economical.”

Dipl. Ing. Axel Reichert, Senior Manager R&D Material

# Developed by Dental Experts for Dental Experts.

---

## **Software integration that protects**

Zolid Lunaris is fully integrated into the Ceramill software — all process-relevant parameters are preloaded to ensure safe and reliable handling.

## **Milling results that impress**

The balanced white density protects the tools and enables precise, thin margins. The individually calculated shrinkage factor ensures optimal fitting. Combined with Motion Air, it forms the perfect team for excellent results.

## **Sintering results that amaze**

The specially developed sintering program delivers highly aesthetic restorations in Vita shades with over 1.000 MPa strength — natural, durable, and reliable.

## **Speed that excites**

In combination with the Therm DRS, Zolid Lunaris offers unprecedented speed in the Zolid portfolio: restorations can be sintered in just 15 minutes — without compromising quality or aesthetics.

## **Compatibility that connects**

The 98 mm blank format integrates seamlessly with common dental milling machines. Its broad machine compatibility ensures smooth workflows and maximum flexibility.

**“Zolid Lunaris delivers impressive aesthetics combined with high strength— a truly compelling product.”**

Zirconnet, Alain Sakr, Bukarest

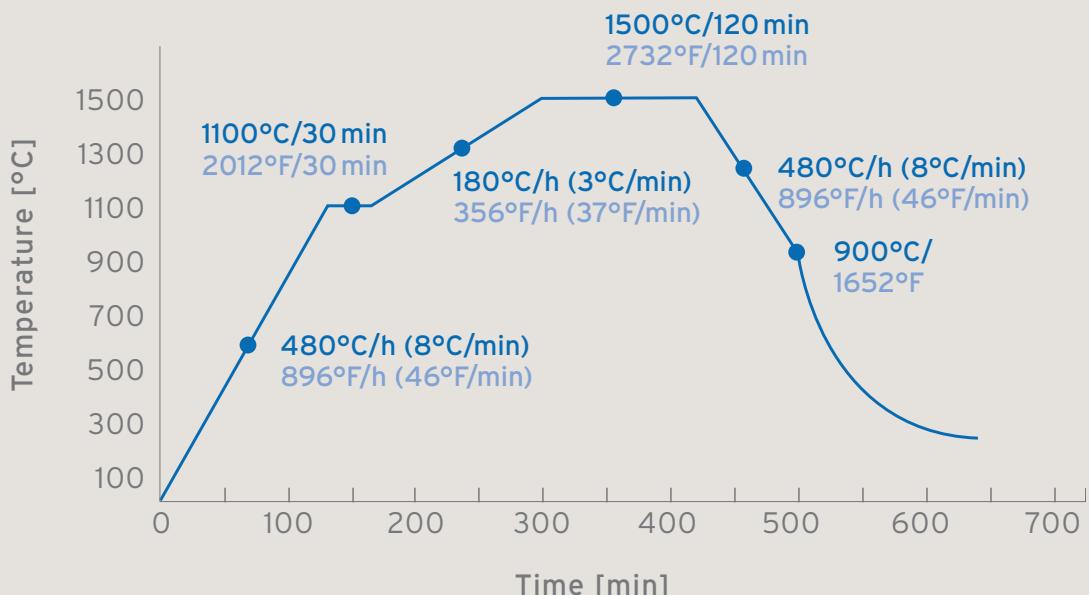

# Perfect Synergy between Sintering Process and Material.

Proper sintering is crucial, as this step determines the desired material properties. Zolid Lunaris is processed using its own dedicated sintering pro-

gram, ensuring reliable strength and appealing aesthetic results.

# Service & Education at its Best.

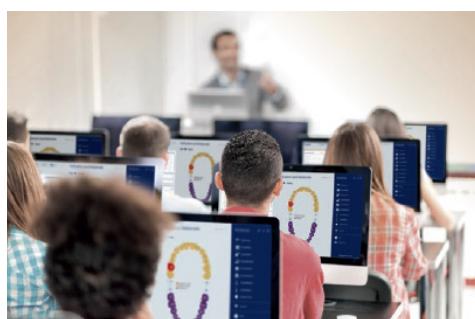

## AG Academy

Ongoing product innovations, frequent training events and suggestions from our customers and partners led us to establish the AG Academy.

We offer both in-person courses at our own training centers in Austria, Germany, Lebanon, Singapore, Brazil & USA and of course, live online courses and on-demand webinars that are available anytime, anywhere. Continuous development and addressing current topics and needs make our AG Academy unique and offer lasting added value for our partners.

AG-Academy: course at the training center, online training courses.

## Two Decades of Experience

For over 20 years, Amann Girrbach has been producing zirconia blanks at its Austrian site. What began as the manufacturing of simple milling blocks has evolved into a state-of-the-art production facility, delivering certified products to over 90 countries worldwide according to the latest standards.

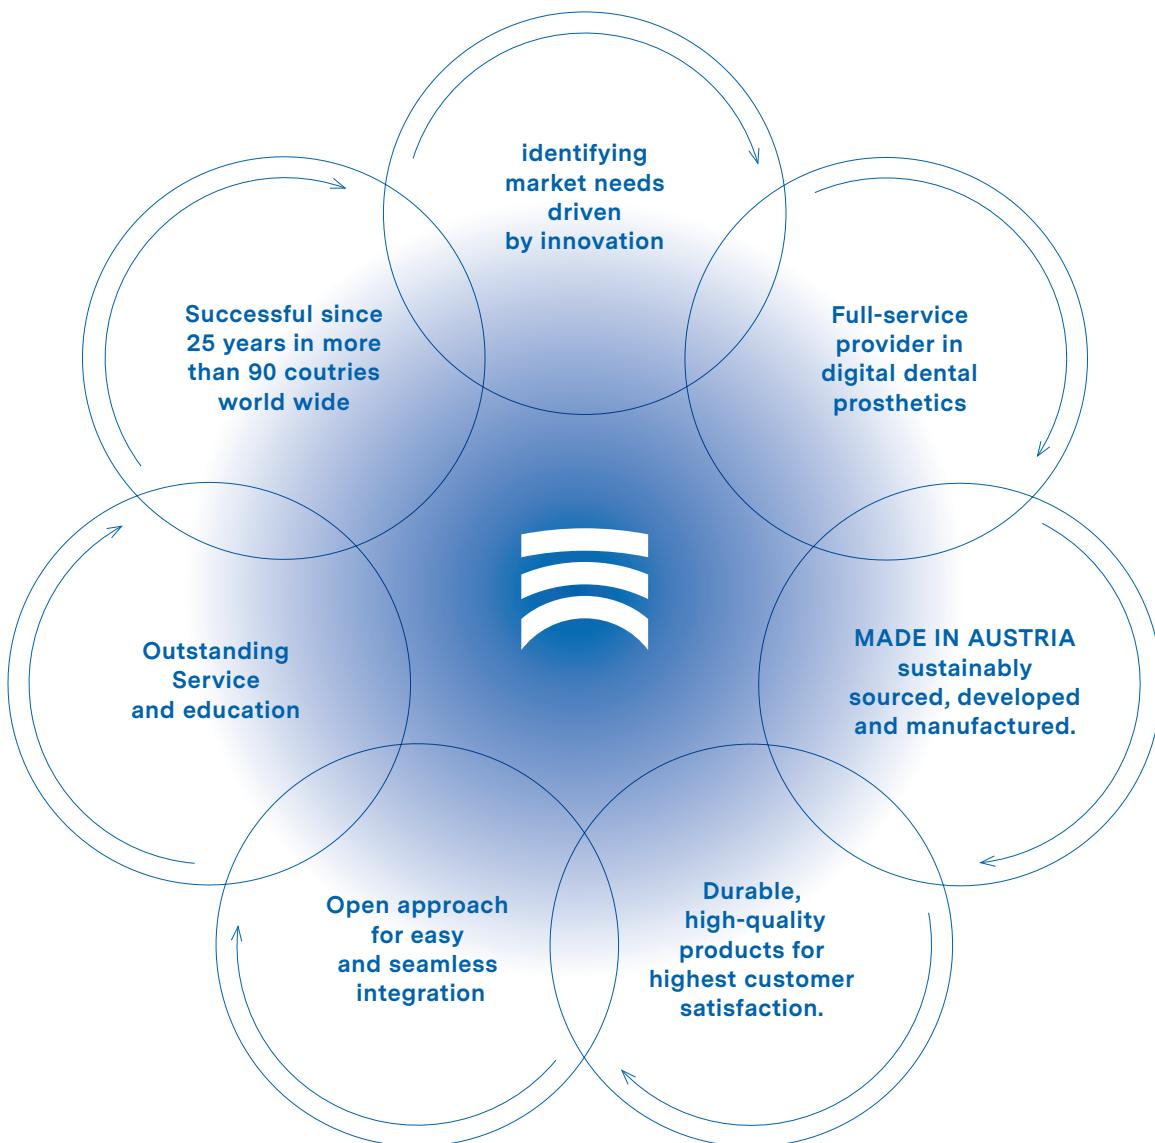

We also develop and produce our own milling machines and sintering furnaces, enabling unique manufacturing depth and precise coordination of every production step. The result: reliable products that inspire laboratories, dental practices, and patients around the globe.

## Innovation Driven for your Sustainable Workflow.

AG-Headquarter Maeder, Austria

Our headquarters in Austria's Rhine Valley reflect our natural commitment to sustainability. Surrounded by forests, meadows, and mountains, Vorarlberg inspires innovation—earning its reputation as the “Silicon Valley of the Alps” and leading Europe in patent applications per capital.

At Amann Girrbach we are therefore committed to the efficient and responsible use of energy and raw materials, as well as to environmentally compatible production.

# About Amann Girrbach

As a pioneer in dental CAD/CAM technology, Amann Girrbach is among the leading innovators and preferred full-service providers in digital dental prosthetics. With high development expertise and consistent customer orientation, the company offers sophisticated products and open system solutions. In addition to innovative scanning and production solutions designed for interoperability and flexibility, the portfolio is complemented by high-quality materials, strong technical service with a globally positioned helpdesk, as well as educational offerings and training programs.

Its customers in around 90 countries include dental practices, practice laboratories, and dental laboratories. A high quality standard and sustainability are critical value creation criteria for Amann Girrbach, which is why the entire development and production are located at the headquarters in Mäder, Austria. Additionally, Amann Girrbach has sales subsidiaries in Pforzheim (Germany), Verona (Italy), Jossigny (France), Charlotte (USA), Singapore (city), Curitiba (Brazil), Beijing (China), as well as cooperations in Kyoto (Japan) and Beirut (Lebanon).
