Special labelling of certain preparations:

Contains Bisphenol A Diglycidylether Diacrylat (BADGE-DA). May produce an allergic reaction.

· Other hazards

- · Results of PBT and vPvB assessment
 - · PBT: Not applicable.
 - **vPvB:** Not applicable.

3 Composition/information on ingredients

· Chemical characterization: Mixtures

· Description: ·

Dangerous components:

CAS: 55818-57-0 Bisphenol A Diglycidylether Diacrylat (BADGE-DA)

EINECS: 225-144-3

· Additional information For the wording of the listed risk phrases refer to section 16.

4 First aid measures

· Description of first aid measures

- After inhalation Supply fresh air; consult doctor in case of symptoms.
- · After skin contact instantly wash with water and soap and rinse thoroughly.
- After eye contact
- Rinse opened eye for several minutes under running water. Then consult doctor.
- After swallowing Rinse out mouth and then drink plenty of water.
- · Information for doctor
 - Most important symptoms and effects, both acute and delayed No further relevant information available.
 - Indication of any immediate medical attention and special treatment needed No further relevant information available.

5 Firefighting measures

- Extinguishing media
- Suitable extinguishing agents Use fire fighting measures that suit the environment. Special hazards arising from the substance or mixture
- Formation of toxic gases is possible during heating or in case of fire.
- Advice for firefighters
- Protective equipment: No special measures required.
 Additional information -

6 Accidental release measures

- Personal precautions, protective equipment and emergency procedures Wear protective clothing.
- Environmental precautions: No special measures required.
- **Methods and material for containment and cleaning up:** Absorb with liquid-binding material (diatomite, universal binders, for small amounts tissues). Dispose of the material collected according to regulations.
- · Reference to other sections
- See Section 7 for information on safe handling See Section 8 for information on personal protection equipment.
- See Section 13 for information on disposal.

7 Handling and storage

·Handling

Precautions for safe handling Ensure good ventilation/exhaustion at the workplace.
 Information about protection against explosions and fires: No special measures required.

· Conditions for safe storage, including any incompatibilities

· Storage

- **Requirements to be met by storerooms and containers:** No special requirements. • **Information about storage in one common storage facility:** Not required.
- Further information about storage conditions: Store cool (not above 25 °C).

· Specific end use(s) No further relevant information available.

8 Exposure controls/personal protection

- Control parameters
 - Components with critical values that require monitoring at the workplace:

The product does not contain any relevant quantities of materials with critical values that have to be monitored at the workplace.

No further relevant information available.

10 Stability and reactivity

· Reactivity

- Chemical stability
- **Conditions to be avoided:** No decomposition if used and stored according to specifications. · Possibility of hazardous reactions No dangerous reactions known
- · Conditions to avoid No further relevant information available.
- · Incompatible materials: No further relevant information available.
- · Hazardous decomposition products: None
- · Additional information:

If stored longer than recommended and/or above recommended temperature, product may polymerize generating heat.

11 Toxicological information

· Information on toxicological effects

- · Acute toxicity:
 - · Primary irritant effect:
 - on the skin: No irritant effect.
 - on the eye: No irritant effect. Sensitization: No sensitizing effect known.
- Additional toxicological information:

The product is not subject to classification according to the calculation method of the General EC Classification Guidelines for Preparations as issued in the latest version.

When used and handled according to specifications, the product does not have any harmful effects according to our experience and the information provided to us.

12 Ecological information

- · Toxicitv
 - Aquatic toxicity: No further relevant information available.
- · Persistence and degradability No further relevant information available.
- · Behaviour in environmental systems:
 - Bioaccumulative potential No further relevant information available.
 - Mobility in soil No further relevant information available.
- Additional ecological information:
 - General notes:
 - Do not allow product to reach ground water, water bodies or sewage system. Danger to drinking water if even small quantities leak into soil.

· Results of PBT and vPvB assessment

- PBT: Not applicable.
- vPvB: Not applicable.
- · Other adverse effects No further relevant information available.

13 Disposal considerations

· Waste treatment methods

Recommendation

Small quantities can be polymerized by light and the cured solid material can be disposed of with the regular garbage. Larger quantities must be disposed of following the regulations of the local authorities.

Safety data sheet

according to 1907/2006/EC, Article 31 Printing date 06.12.2012 Revision: 06.12.2012 1 Identification of the substance/mixture and of the company/undertaking · Product identifier - Trade name: cre-active -PALA/ Signum- colourfluids, transpafluids, gingiva Relevant identified uses of the substance or mixture and uses advised against No further relevant information available. · Application of the substance / the preparation Auxiliary for manufacture of dental prothesis · Details of the supplier of the safety data sheet Manufacturer/Supplier: Heraeus Kulzer GmbH Grüner Weg 11, D-63450 Hanau Tel.: 0800 4372522 · Informing department: Dr. Klaus Ruppert Tel.: +49 6081 959-210 Fax: +49 6081 959-223 email: klaus.ruppert@heraeus.com Emergency telephone number: Call "Poisoning Emergency Center Berlin": +49 30 30686 790 (24 hours, support in english and german language) 2 Hazards identification Classification of the substance or mixture Classification according to Directive 67/548/EEC or Directive 1999/45/EC void Information concerning particular hazards for human and environment: The product has to be labelled due to the calculation procedure of the "General Classification guideline for preparations of the EU" in the latest valid version. Classification system: The classification is in line with current EC lists. It is expanded, however, by information from technical literature and by information furnished by supplier companies. · Label elements · Labelling according to EU guidelines: Observe the normal safety regulations when handling chemicals The product is not subject to classification according to the calculation methods of the "General Classification Guideline for Preparations of the EC" as issued in the last version. The product is not subject to identification regulations under EC Directives and the Ordinance on Hazardous Materials (GefStoffV). Other hazards · Results of PBT and vPvB assessment · PBT: Not applicable. · vPvB: Not applicable. 3 Composition/information on ingredients Chemical characterization: Mixtures Description: Product based on methacrylates · Dangerous components: Void Additional information For the wording of the listed risk phrases refer to section 16. 4 First aid measures

· Description of first aid measures

- · General information No special measures required.
- · After skin contact The product is not skin irritating.

Printing date 06.12.2012

Revision: 06.12.2012

Trade name: cre-active -PALA/ Signum-

(Contd. of page 1)

- · After eye contact Rinse opened eye for several minutes under running water.
- After swallowing Initiate vomiting and consult a doctor.
- · Information for doctor
 - *Most important symptoms and effects, both acute and delayed* No further relevant information available.
 - Indication of any immediate medical attention and special treatment needed No further relevant information available.

5 Firefighting measures

· Extinguishing media

- · Suitable extinguishing agents
- CO2, extinguishing powder or water jet. Fight larger fires with water jet or alcohol-resistant foam. Use fire fighting measures that suit the environment.
- Special hazards arising from the substance or mixture No further relevant information available. • Advice for firefighters
 - · Protective equipment: No special measures required.
- · Additional information -

6 Accidental release measures

- · Personal precautions, protective equipment and emergency procedures Not required.
- · Environmental precautions: No special measures required.
- Methods and material for containment and cleaning up:
- Absorb with liquid-binding material (diatomite, universal binders, for small amounts tissues). • Reference to other sections
- No dangerous materials are released. See Section 8 for information on personal protection equipment.

7 Handling and storage

- · Handling
 - Precautions for safe handling No special measures required.
 Information about protection against explosions and fires:
- Information about protection against explosions and fires: No special measures required.
- Conditions for safe storage, including any incompatibilities
 Storage
 - Requirements to be met by storerooms and containers: No special requirements.
 - Information about storage in one common storage facility: Not required.
 - Further information about storage conditions: Store cool (not above 25 °C).
- Specific end use(s) No further relevant information available.

8 Exposure controls/personal protection

- · Additional information about design of technical systems: No further data; see item 7.
- · Control parameters
 - Components with critical values that require monitoring at the workplace:
 - The product does not contain any relevant quantities of materials with critical values that have to be monitored at the workplace.

• Additional information: The lists that were valid during the compilation were used as basis.

Exposure controls

- Personal protective equipment
 - General protective and hygienic measures
 - The usual precautionary measures should be adhered to in handling the chemicals.
 - · Breathing equipment: Not required.
 - · Protection of hands: Not required.
 - Material of gloves

The selection of the suitable gloves does not only depend on the material, but also on further marks of quality and varies from manufacturer to manufacturer.

· Penetration time of glove material

The exact break trough time has to be found out by the manufacturer of the protective gloves and has to be observed.

- · For the permanent contact in work areas without heightened risk of injury (e.g. Laboratory) gloves made of the following material are suitable: Natural rubber, NR
- For the permanent contact of a maximum of 15 minutes gloves made of the following materials are suitable: PVC or PE gloves Natural rubber, NR

- · Eye protection: not absolutely neccessary
- · Body protection: Light weight protective clothing

9 Physical and chemical properties

Information on basic physical and chemical properties General Information Appearance: Form: Colour: Colour: Smell: Weak, characteristic			
Change in condition Melting point/Melting range: Not determined Boiling point/Boiling range: Not determined			
· Flash point:	Not applicable		
• Self-inflammability: Product is not selfigniting.			
 Danger of explosion: 	Danger of explosion: Product is not explosive.		
· Density	Not determined		
Solubility in / Miscibility Water: Other information	with Not miscible or difficult to mix No further relevant information available.		

10 Stability and reactivity

· Reactivity

Chemical stability

Conditions to be avoided: No decomposition if used and stored according to specifications.

- · Possibility of hazardous reactions No dangerous reactions known
- Conditions to avoid No further relevant information available.
- · Incompatible materials: No further relevant information available.
- · Hazardous decomposition products: None

· Additional information:

If stored longer than recommended and/or above recommended temperature, product may polymerize generating heat.

11 Toxicological information

· Information on toxicological effects

· Acute toxicity:

- Primary irritant effect:
 - on the skin: No irritant effect.
 - · on the eye: No irritant effect.
- · Sensitization: No sensitizing effect known.
- · Additional toxicological information:

The product is not subject to classification according to the calculation method of the General EC Classification Guidelines for Preparations as issued in the latest version.

When used and handled according to specifications, the product does not have any harmful effects according to our experience and the information provided to us.

12 Ecological information

· Toxicity

- Aquatic toxicity: No further relevant information available.
- · Persistence and degradability No further relevant information available.
- · Behaviour in environmental systems:
- · Bioaccumulative potential No further relevant information available.

• Mobility in soil No further relevant information available.

- Additional ecological information:
 - · General notes:

Do not allow undiluted product or large quantities of it to reach ground water, water bodies or sewage system.

- · Results of PBT and vPvB assessment
 - PBT: Not applicable.
 vPvB: Not applicable.
- · Other adverse effects No further relevant information available.

13 Disposal considerations

· Waste treatment methods

Recommendation

Small quantities can be polymerized by light and the cured solid material can be disposed of with the regular garbage. Larger quantities must be disposed of following the regulations of the local authorities.

· European waste catalogue

18 01 06 chemicals consisting of or containing dangerous substances

· Uncleaned packagings:

Recommendation: Disposal must be made according to official regulations.

14 Transport information

· UN-Number

· ADR, ADN, IMDG, IATA

Void
